EXECUTIVE SUMMARY

Computer Science graduate with hands-on experience developing, testing, and deploying backend and full-stack applications, REST APIs, and database-driven software solutions. Proficient in Python, Java, JavaScript, SQL, and C++, with experience using object-oriented programming, Node.js, Express.js, Git, cloud technologies, Docker, and CI/CD pipelines. Experienced in building CRUD applications, relational database solutions, authentication systems, and RESTful APIs. Strong problem-solving, debugging, communication, and teamwork skills with an interest in building scalable software solutions using modern development and cloud technologies.

SKILLS

Programming Languages: Python, Java, JavaScript, SQL, C++, C# Fundamentals
Backend & Frameworks: Node.js, Express.js, REST APIs, Sequelize, JWT Authentication, ASP.NET Core Fundamentals
Databases: SQLite, SQL, Relational Database Design, SQL Server Fundamentals
Cloud & DevOps: AWS, Google Cloud Platform, Docker, Docker Compose, Google Cloud Run, Google Cloud Build, CI/CD
Testing & API Tools: Jest, Supertest, Postman, API Testing, Debugging
Developer Tools: Git, GitHub, Visual Studio Code, Cursor, Command Line, Linux
Software Engineering: Object-Oriented Programming, Data Structures, Software Development Lifecycle, API Design, Authentication & Authorization
AI Technologies: Generative AI, AI-Assisted Development Tools
Spoken Languages: English (Native), French (Native)

RELEVANT COURSEWORK

Inside of a Microprocessor • Intro to C: How Computers Really Work • Data Structures • Application Development I: Backend • Application Development II: Frontend • Modern Technologies • Programming for Everyone II • Data Ethics

EDUCATION

Belmont Abbey College
Bachelor of Science in Computer Science | July 2026 Belmont, NC

CERTIFICATIONS

- Introduction to Cybersecurity Tools & Cyber Attacks – IBM (Apr 2023)
- Homeland Security & Cybersecurity Connection – University of Colorado (Apr 2023)
- Network Security & Database Vulnerabilities – IBM (Apr 2023)

PROJECTS

Basketball Tournament Management API

- Built a REST API using Node.js, Express, and Sequelize to manage teams, players, and games
- Implemented JWT authentication and role-based authorization
- Developed full CRUD functionality and deployed to production on Render
- GitHub: https://github.com/DLubamba0/Basketball-Tournament-API | Live: basketball-api-mlhy.onrender.com

Recipe Sharing Application

- Developed a full-stack recipe management application using Node.js, Express.js, Sequelize, and SQLite with full CRUD functionality
- Designed and integrated RESTful API endpoints with a structured relational database architecture
- Containerized application components using Docker and Docker Compose for consistent development and deployment
- Implemented cloud deployment and CI/CD workflows using Google Cloud Run and Google Cloud Build
- GitHub: github.com/DLubamba0/final-project-recipe-app

ACTIVITIES

Men's Basketball Program — Belmont Abbey College
Team Captain / Student-Athlete 24-25, 25-26

- Led teammates through practices, games, and competitive play as Team Captain
- Demonstrated leadership, time management, and teamwork while balancing a full academic course load

Career Services Student Club — Belmont Abbey College
Member

- Engaged in career development events, networking sessions, and professional workshops to strengthen communication, leadership, and job search skills while connecting with employers and industry professionals.
